

```
private static final int START = 10;
```

```
public void run() {
```

Correct
variable type

```
int i = START;
```

Uses constant

```
while(i >= 0) {
```

Uses >= operator

```
println(i);
```

Off-by-one loop

loop counting down

```
i = i - 1;
```

while loop
solution

```
}
```

```
}
```
